PROFILE

Final-year Computer Science student focused on Artificial Intelligence, Computer Vision, and full-stack engineering. I combine deep learning skills (PyTorch, custom CNNs) with a solid background in Responsible AI and backend development (Java/Spring Boot). I have experience building safety-critical AI pipelines, auditing generative models, and turning complex data into clear insights to create reliable software systems.

EDUCATION

Computer Science BSc | University of Leicester, Leicester, UK | Sept. 2023 - June 2026 | Predicted 1:1

- **Key Modules:** Algorithms & Data Structures, Cloud Computing, Software Architecture & System Development, AI for Space, Data Analytics, Object-Oriented Programming.
-

KEY PROJECTS

Automated Quality Control System for Welded Joints (Final Year Project)

- **Programmed Pipeline:** Built an end-to-end Python CV pipeline (VGG16, custom sliding window) to detect defects in high-res industrial X-rays, deployed via Flask REST API.
- **Safety Optimisation:** Calibrated the model for >95% recall, aggressively minimising false negatives for a domain where undetected anomalies are catastrophic.

Auditing Generative Models & HCI Frameworks

- **Socio-Technical Audit:** Evaluated the CDC's VAMS interface (95% grade), documenting systemic HCI failures and allocative harm to vulnerable groups.
- **Generative AI Application:** Used Microsoft Copilot and advanced prompt engineering to reconstruct restricted UI elements, building a strict framework to verify outputs and find AI hallucinations.

Gamified Learning Platform for IBM SkillsBuild

- **Full-Stack App:** Co-developed a Java/Spring Boot and JS/Tailwind web app featuring dynamic leaderboards, context-aware certification filtering, and a custom badge system.
- **Agile Leadership:** Acted as Scrum Master to enforce Agile principles, manage the product backlog, and ensure strict adherence to the Definition of Done (DoD).

Spring Boot Product Management System

- **MVC Architecture:** Engineered a zero-config Java 17 and Spring Boot web app for robust shop and inventory management.
- **Data Integrity:** Implemented full CRUD functionality with intelligent, context-aware routing and strict custom server-side validation rules.

Projects: Available on GitHub

RELEVANT WORK EXPERIENCE

UoL Content Creator | University of Leicester, UK | Sept. 2025 - Present

- Produced the university's highest-performing student content (Golden Mile Diwali campaign), utilising visual storytelling techniques to engage diverse audiences.
- Managed the full production lifecycle from creative pitch to final edit, ensuring alignment with recruitment marketing strategies.

Teaching Demonstrator (Computing) | University of Leicester, UK | Sept. 2025 – Jan. 2026

- Translated complex technical logic into clear, actionable guidance for students, ensuring understanding of core principles.
- Collaborated with the module team to deliver consistent support, earning positive feedback for communication clarity.

CNC operator/programmer (Internship) | Vimi Fasteners, Novellara, Italy | Feb. 2021 – March 2021

- Ensured quality and accuracy of finished products by inspecting them post-production
- Designed machine footprints using AutoCAD and programmed automated robots, contributing to efficient workplace layout and operational automation.

Store Manager | T.K. Market, Correggio, Italy | March 2018 – Dec. 2021

- Managed all customer escalations and communications, building a strong reputation for outstanding service and effective problem resolution.
- Recruited, trained, and mentored a high-performing team of 2 employees, fostering a positive work culture.
- Optimised all store operations by creating an efficient inventory management system, based on cloud software.
- Built the store's digital presence, launching a Google Business profile that consistently maintained a 4.5/5 customer rating and created a social media strategy that led to over 200 followers within the first 3 months.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, SQL, Shell Script, HTML5/CSS3.
- **AI & Data Science:** PyTorch, TensorFlow/Keras, Pandas, NumPy, Scikit-learn, BeautifulSoup.
- **Backend & Databases:** Spring Boot, Spring MVC, Spring Data JPA, PostgreSQL, MySQL.
- **Frontend Web:** ReactJS, Tailwind CSS, Bootstrap.
- **DevOps & Version Control:** Git, GitHub/GitLab, Linux.

CERTIFICATIONS & ACHIEVEMENTS

- **Build Your First Chatbot** – IBM (in collaboration with University of Leicester)
